CHEMICLEAN

Aquarium Treatment for Cyanobacteria

- Effectively cleans stains caused by red, black, bluegreen, and methane (bubble-producing) cyanobacteria in aquariums
- Targets cyanobacteria encouraged by the presence of nitrate and ammonia
- Safe for all fish, corals, invertebrates, beneficial macro algae, and nitrifying bacteria in reef systems
- Quick and easy to use works within 24-48 hours by oxidizing trapped organic sludge and promoting a healthy enzyme balance

VITACHEM

Tissue-soluble Multi-vitamin for Healthy Fish

- Pre-stabilized, water and tissue-soluble formula for freshwater, saltwater, and invertebrates
- Enhances natural color, vitality, and appetite while promoting rapid growth and fin regeneration
- Fortified with 30-37 high-quality amino acids extracts to improve immunity and breeding success
- Trusted by aquarists, breeders, and public aquariums worldwide for over 40 years

America's #1 Filtration Media

Trusted by hobbyists and professionals worldwide for over 60 years, we delivers premium filtration that stabilizes water quality and supports healthy aquatic life. Our products are the longest-lasting and most effective carbon media in the industry.

CHEMI-PURE

All Purpose Water Clarifier for Any Aquarium

- Stabilizes pH and balances positive & negative ions
- Removes toxins like copper, phenol, and organics
- Retains vital trace elements for fish health
- Promotes natural neurological response and fish lifespan 3-4x
- Protects beneficial bacteria, no pollution risk
- Rinses clear quickly for sparkling water
- Safe for all freshwater & saltwater aquariums ideal for African cichlids, Discus, and all types of fish

CHEMI-PURE ELITE

Advanced Media + Long-Lasting Phosphate Control

- Contains GFO (Granular Ferric Oxide) to effectively remove and control phosphates and silicates in the aquarium while maintaining all the benefits of original
- Eliminates the need for bulk iron oxide removers or expensive phosphate reactor
- Easy to use, pre-packed in high-quality nylon bag
- Controls nuisance algae and prevents cloudy water
- Ideal for aquariums with phosphate or algae issues
- Suitable for all types of aquariums

CHEMI-PURE GREEN

Premium Water Clarifier for Thriving Plants

- All-in-one filtration for freshwater planted tanks
- Removes tannins, toxins, odors, and organics
- Retains vital nutrients for vibrant plant growth
- QuickWash™ Carbon with 30% more surface area
- Dual hybrid resins balance water and boost clarity
- Enhances light penetration for lush, healthy plants

CHEMI-PURE BLUE

Premium Water Clarifier for Reef Perfection

- Removes organics, odors, toxins, dissolved metals, and other harmful compounds
- Advanced hybrid resins remove organics and phosphates, stabilize pH and redox balance
- Rapidly absorbs nitrogenous waste, phosphates, and even trace nitrates
- High-capacity activated carbon reduces HLLE (Head and Lateral Line Erosion) risk
- Lasts longer, minimizing water changes
- Ideal for reef, marine, jellyfish, and African cichlids

Now Featuring: QuickWash™ Carbon

Pre-washed, **0.08mm** extruded pelletized activated carbon with **30**% more surface area than original carbon

Less dust, better flow, higher efficiency (Compare with our original formula) What's the difference?

GUIDE TO CHOOSING CHEMI-PURE

CONTENTS

Extruded pelletized carbon + ion exchange resins

TANK TYPE

Any medium-heavy bioload freshwater or saltwater aquarium

BENEFITS

Clear and contaminant free water

Extruded pelletized carbon + ion exchange resins + granular ferric oxide (GFO)

Any medium-heavy bioload freshwater or saltwater aquarium

Clear and contaminant free water with the added benefit of long-lasting phosphate control

Extruded pelletized carbon + phosphate resin + organic scavenger resin

Higher pH tanks such as saltwater reef tanks, African Cichilids, Goldfish and Koi

Clear and contaminant free water with the added benefit of long-lasting phosphate control

Extruded pelletized carbon + ion exchange resins + organic scavenger resin

Freshwater planted aquariums

Crystal-clear, contaminant-free water with organic waste control without aggressive phosphate removal that supports healthy plant growth
